To whom it may concern:

I am writing to let you know how much XM Radio is appreciated especially the instant traffic and weather. I am a truckdriver, and I travel state from state. I travel through severe weather a lot of the times and it is important to us truckers out here, traveling from one state to another to know whats going on out there whether it be traffic accidents or severe weather. Most of the time we truck drivers do not have the time to stop and turn on local news to find out what is going on. Most of the time we are paying more attention to the roads and our safety and others so we don't have time to scan through the radio channels to find the weather update or traffic update. By having the access to the instant weather and traffic on XM radio. It is more easier for us to do our job for the american people, our companies and families by making sure we are safe. Please don't take away the XM radio traffic and weather. That is one of the main reasons I bought it for, so that I could have immediate access to the weather and traffic.
